SUMMARY INFORMATION

| | |
|------------------------|--------------------------|
| Waterbody: | San Diego Creek, Reach 2 |
| 303(D) Listing: | Metals (Nickel)** |
| Listed Segment: | 2.7 Miles |
| Recommendation: | De-Listing Recommended |

** Note that the listing is generic for metals, but for evaluation purposes, each metal was evaluated separately

EVALUATION CRITERIA

| | |
|---|---|
| WQ Standard(s): | #1: Acute Toxicity - Nickel. Standard based on dissolved fraction and is hardness dependent. |
| | #2: Chronic Toxicity - Nickel. Standard based on dissolved fraction and is hardness dependent. |
| Data Evaluation Period: | October 2000 - December 2006 |
| Sample Size: | 118 |
| Exceedances to Trigger Listing:* | 20 |
| Exceedances Allowed* (i.e. warrants De-Listing): | 10 |
| Previous Listing Basis: | Unknown at this time. Metals are part of the EPA promulgated 2002 Toxics TMDL. A Metals TMDL Basin Plan Amendment and implementation plan are pending from the RWQCB. |

* = based on State Listing Policy binomial formula for the sample size

ASSESSMENT OF CURRENT LISTING

| | |
|--------------------------------|--|
| WQ Standard #1: | |
| <i>Number of Exceedances:</i> | 0 |
| <i>Summary of Analysis:</i> | All samples during both low flow and storm conditions were in compliance with the applicable hardness dependent standard. |
| <i>Listing Recommendation:</i> | De-listing recommended |
| WQ Standard #2: | |
| <i>Number of Exceedances:</i> | 0 |
| <i>Summary of Analysis:</i> | Analysis was conducted under the very conservative assumption of comparing a single sample (whether a grab or 24-hour composite) to the chronic criteria. (Note - the chronic criteria applies to conditions that persist for 96-hours). All samples during low flow and storm conditions were in compliance with the applicable hardness dependent standard. |
| <i>Listing Recommendation:</i> | De-listing recommended |

7729

SUMMARY INFORMATION

| | |
|------------------------|--------------------------|
| Waterbody: | San Diego Creek, Reach 2 |
| 303(D) Listing: | Metals (Silver)** |
| Listed Segment: | 2.7 Miles |
| Recommendation: | De-Listing Recommended |

** Note that the listing is generic for metals, but for evaluation purposes, each metal was evaluated separately

EVALUATION CRITERIA

| | |
|---|--|
| WQ Standard(s): | #1: Acute Toxicity - Silver. Standard based on dissolved fraction and is hardness dependent. #2: Chronic Toxicity - Silver. The CTR does not have a chronic toxicity standard that applies to silver. |
| Data Evaluation Period: | October 2000 – December 2006 |
| Sample Size: | 118 |
| Exceedances to Trigger Listing:* | 20 |
| Exceedances Allowed* (i.e. warrants De-Listing): | 10 |
| Previous Listing Basis: | Unknown at this time. Metals are part of the EPA promulgated 2002 Toxics TMDL. A Metals TMDL Basin Plan Amendment and implementation plan are pending from the RWQCB. |

SUMMARY INFORMATION

| | |
|-----------------|--------------------------|
| Waterbody: | San Diego Creek, Reach 2 |
| 303(D) Listing: | Metals (Arsenic)** |
| Listed Segment: | 2.7 Miles |
| Recommendation: | De-Listing Recommended |

** Note that the listing is generic for metals, but for evaluation purposes, each metal was evaluated separately

EVALUATION CRITERIA

| | |
|--|--|
| WQ Standard(s): | #1: Acute Toxicity - Arsenic. Standard based on dissolved fraction and is NOT hardness dependent. Standard is 340 ppb. #2: Chronic Toxicity - Arsenic. Standard based on dissolved fraction and is NOT hardness dependent. Standard is 150 ppb. |
| Data Evaluation Period: | October 2000 – December 2006 |
| Sample Size: | 34 |
| Exceedances to Trigger Listing:* | 3 |
| Exceedances Allowed* (i.e. warrants De-Listing): | 2 |
| Previous Listing Basis: | Arsenic was not included in the EPA promulgated 2002 Toxics TMDL. |

* = based on State Listing Policy binomial formula for the sample size

ASSESSMENT OF CURRENT LISTING

| | |
|-------------------------|--|
| WQ Standard #1: | |
| Number of Exceedances: | 0 |
| Summary of Analysis: | All samples during both low flow and storm conditions were in compliance with the CTR standard. |
| Listing Recommendation: | De-listing recommended |
| WQ Standard #2: | |
| Number of Exceedances: | 0 |
| Summary of Analysis: | Analysis was conducted under the very conservative assumption of comparing a single sample (whether a grab or 24-hour composite) to the chronic criteria. (Note – the chronic criteria applies to conditions that persist for 96-hours). All samples during low flow and storm conditions were in compliance with the CTR standard. |
| Listing Recommendation: | De-listing recommended |

CMC : Contaminant Maximum Concentration - Highest concentration that aquatic life can be exposed to without deleterious effects.

CCC : Contaminant Continuous Concentration - Highest concentration that aquatic life can be exposed to for an extended period (4 days) without deleterious effects.

For Hardness greater than 400 mg/L multiply CMC or CCC by Water Effects Ratio (WER). Alternatively use criterion at for hardness=400 and WER=1.
